SUMMARY

Full-stack web developer experienced in creating responsive, user-friendly applications with a focus on clean design and functionality. Strong background in front-end technologies like C#, JavaScript, HTML and CSS, alongside solid experience with back-end frameworks and development using various databases. Enthusiastic about problem-solving and finding innovative solutions to enhance user experience. Spanish citizen, legally authorized to work in Spain and across the European Union.

EDUCATION

06/2026

Bachelor degree | Informatics Engineering | Software Engineering
Universitat Politècnica de Catalunya (UPC), Barcelona

EXPERIENCE

February 2026 - September 2026

Independent Full-Stack developer Personal Project

- Independently designed, developed, and maintained Talahelen, a publicly accessible multilingual dictionary platform
- Designed and implemented the full-stack application architecture, combining a responsive web interface with a Node.js backend and MySQL relational database.
- Developed search functionality, vocabulary management tools, translation systems, and support for linguistic examples, citations, and relationships between words.
- Built an English localisation system, extending the original Russian-language platform to support a broader international audience.
- Created dedicated editing interfaces for managing dictionary content and localised entries. Managed deployment, database maintenance, troubleshooting, and ongoing feature development.
- Independently planned and prioritised improvements, balancing technical requirements, usability, and long-term maintainability.
- Applied analytical thinking, creativity, attention to detail, and continuous learning to solve complex technical and data-organisation challenges.

Project is available at: <https://aglaya.pro/talahelen/>

October 2025 - July 2026

Web Developer Iberital de Recambios S.A. | Barcelona, Spain

- Internship and Bachelor Degree project (AppFabrica).
- Designed and built a web application AppFabrica for assembly workers at the coffee machine plant.
- Developed and maintained responsive website designs, improving user experience across various devices.
- Utilised C#, JavaScript, HTML, and CSS to create interactive and visually appealing web pages.
- Improved web design and usability through UX testing.
- Managed back-end services and database integration, ensuring seamless data flow and storage solutions.
- Documented development processes, creating comprehensive guides for future maintenance and updates.
- Recommendation Letter: <https://aglaya.pro/recommendation.pdf>
